

Geography for Year 1

Throughout Year 1 and 2 children will be encouraged to develop knowledge about their own locality, and about countries and their locations. Children will learn how they are connected, and will find out different ways of travelling between locations. Geography will be taught as a topic based subject integrated with other curriculum areas rather than as a discrete subject.

Mapping skills

Children will develop skills in mapping through investigation of the local area. They will start with their immediate environment by mapping their classroom. They can further practice their skills by participating in a class treasure hunt. The students will further this investigation by choosing a room in their house to create a map.

Around our school - the local area

Children will learn about the community surrounding the school by discussing the different types of jobs that people in the community hold. Also, the people who work in jobs that help us.

Our community and the world

Connecting our location to the world: children will learn about the different ways that people travel in the local community and also around the world. The children will also develop geographical awareness through learning about the continents.
